

SAN VE TIC LTD ŞTI

MATEX

Leader of Textile Screen Printing Inks

PF SYSTEM PHTALATE FREE PLASTISOL

Due to not containing Phthalate, it is formulated to be used particularly for children groups

USAGE

- It gives very soft touch. (water based plastic touch).
- It gives half mat and filled colour.
- Because of its thin and cover structure the ink itself should be used at 77 no mesh screens..
- When it is needed to thin ink, its special thinner PF Thinner should be used.
- The middle-drying time is 2-3 seconds.

524 PF RAPID WHITE : Because of the problems which are sourced from sensitivities on base ink of **100% polyester and polyester** mixtured fabrics, it is formulated as high technological ink for preventing color mixture on such kinds of fabrics

DRYING

It should dried at temperature of 150 – 160 0 C at a periode of 1.5 – 2 minutes.

PACKAGING

In 15 kg of plastic containers.

Whilst the information and recommendations in the technical bulletin are reliable, they should not be interpreted as a warranty since we do not have any control over the methods and the way(s) that our products are used.
